

In public space areas, it is nearly impossible to clean surfaces after every touch. By specifying our Antimicrobial additive (+ANTI) on our Powder Coated MDF (F8) surfaces and American-Made steel bases, you can gain confidence that your spaces are as safe against the spread of bacteria and other microorganisms as possible. Our electrostatically adhered Powder Coated surfaces are covered top to bottom and provide seamless edges for easy cleaning. Unlike edge banded surfaces, there are no cracks or crevices where bacteria, mold, mildew, algae and fungus can accumulate.

Antimicrobial Tables Are Perfect For:

- Hospitals ■ Restaurants ■ Cafeterias ■ Schools
- Senior Living Communities ■ Multi-Family Housing ■ Stadiums
- Hotels ■ Offices ■ Casinos ■ Airports

ONETREEPLANTED

At Baltix, we are a company set on the foundation of environmental preservation. We are here not only to help your purchases make a difference, but to also help reduce the footprint that our company and our products leave behind. Baltix is proud to have partnered with OneTreePlanted.org, a 501(c)(3) nonprofit that helps restore our forests by replanting trees in deforested areas across the world. In creating our Baltix One Tree Planted partnership, we are taking our environmental leadership one step further; we call this our **Buy One. Grow One™** promise. For every product ordered and manufactured, we have committed to planting one tree in an effort to improve the global environment we share and live in.
